9) Significant judgements and estimates

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Management believes the estimates and assumptions used in the Financial Statements are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

The Company's significant accounting judgments and estimates applied in the Financial Statements are as follows:

Judgments

- Management makes judgments related to expectation of future taxable income, applicable tax opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities.

Estimates

- In calculating the fair value of the share-based compensation and warrants, management makes estimates related to the Company's share price volatility and expected life of the instruments. To the extent that these estimates are not correct, the value of these instruments within equity may differ.
- In calculating the fair value of the flow-through shares and warrants, management makes estimates related to the Company's share price volatility and expected life of the instruments. To the extent that these estimates are not correct, the value of these instruments within equity may differ.
- The fair value of the assets and liabilities purchased with 1246931 B.C. Ltd on October 7, 2020 have been estimated by management.

10) Changes in accounting standards

There are no upcoming changes in accounting standards which impact the Company.

11) Financial instruments and capital management

As at September 30, 2021, the Company's financial instruments consist of cash, receivables and accounts payable. The Company classifies cash and receivables as financial assets held at amortized cost. The Company classifies accounts payable as financial liabilities, and these are held at amortized cost. The fair value of all of the Company's financial instruments approximates their carrying value.

All of the Company's financial instruments are considered to be Level 1 within the fair value hierarchy (as discussed below).

Level 1 – fair values based on unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – fair values based on inputs that are observable for the asset or liability, either directly or indirectly; and

Level 3 – fair values based on inputs for the asset or liability that are not based on observable market data.

The Company's policy for determining when a transfer occurs between levels in the fair value hierarchy is to assess the impact at the date of the event or the change in circumstances that could result in a transfer. There were no transfers between the levels during the three months ended September 30, 2021.

The risk exposure arising from these financial instruments is summarized as follows:

(a) Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's financial assets are cash and receivables. The Company holds its cash in a bank account with a highly rated Canadian financial institution, therefore minimizing the Company's credit risk. Receivables are due from a government agency.

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Company has sufficient funds as of September 30, 2021 to cover its liabilities. The Company's ability to continue to meet its liabilities when due, beyond the current cash balance, is dependent on future support of shareholders through public or private equity offerings.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or value of its holdings or financial instruments. The Company's activities have only been transacted in Canadian dollars since incorporation and until September 30, 2021; in addition, the Company carries no interest-bearing debt. As such, the Company has minimal market risks facing it at present.

Capital Management

In the management of capital, the Company includes the components of shareholders' equity. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral projects for the benefit of its stakeholders. As the Company is in the exploration stage, it has no income from operations, and its principal source of funds is from the issuance of its common shares.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, enter into joint venture arrangements, or dispose of assets.

The Company's investment practice is to invest its excess cash in highly liquid short-term interest-bearing investments selected with regards to expected timing of its expenditures. The Company is not subject to any externally imposed capital requirements.

12) Forward looking statements

All statements, other than statements of historical fact, made by the Company that address activities, events or developments that the Company expects or anticipates will or may occur in the future are forward-looking statements, including, but not limited to, statements preceded by, followed by or that include words such as "may", "will", "would", "could", "should", "believes", "estimates", "projects", "potential", "expects", "plans", "intends", "anticipates", "targeted", "continues", "forecasts", "designed", "goal", or the negative of those words or other similar or comparable words. Readers are cautioned that these statements which describe the Company's plans, objectives, and budgets may differ materially from actual results and as such should not be unduly relied upon by investors. Forward-looking statements contained in this MD&A speak only as to the date of this MD&A, or such other date as may be specified herein, and are expressly qualified in their entirety by this cautionary statement.
